

YUAN GONZALEZ

Miami, FL | 786-660-5360 | Yuan.Gonzalez001@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Engineering graduate at FIU with experience in data analysis, business systems, automation, and technical problem-solving. Skilled in SQL, Python, Power BI, ETL, and Azure, with hands-on experience analyzing business processes, developing reports, automating manual tasks, and supporting data-driven solutions. Familiar with requirements gathering, system analysis, technical documentation, and cross-functional collaboration. Reduced processing times by 20% through scripting automation and process optimization. Azure Certified (AZ-900).

TECHNICAL SKILLS & COMPETENCIES

- Programming Languages: SQL, Python, T-SQL, Shell Scripting, SAS, VB.NET (learning)
- Database Systems: SQL Server, MongoDB
- Business Analysis & Systems: Requirements Solicitation, System Analysis, Technical Design, Process Documentation, Business Process Analysis, Project Planning, Testing and Debugging
- Data Analytics & ETL: Data Analysis, Data Validation, KPI Development, Data Modeling, Power Query, Pandas, NumPy
- Business Intelligence: Power BI, DAX, Dashboard Development, Ad-hoc Reporting, Executive Reporting

PROFESSIONAL EXPERIENCE

Dicomatics (Healthcare Medical Informatics)	Data Migration Engineer	March 2026 – July 2026
• Used SQL Server and T-SQL to investigate migration issues, validate study records, troubleshoot database connectivity, and reconcile source-to-target data discrepancies. • Monitored end-to-end migration pipelines and Grafana dashboards, analyzing import/export rates, success/failure metrics, processing backlogs, and throughput to identify performance bottlenecks. • Executed data migration workflows for medical imaging environments, validating, cleaning, and reconciling large.		
NextEra Energy (Florida Power & Light)	Customer Service Representative II	May 2025 – February 2026
• Managed customer accounts across multiple billing, payment, and internal database systems, verifying real-time data and resolving complex account discrepancies. • Audited customer records, billing transactions, and account histories to identify data inconsistencies, investigate errors, and maintain high data accuracy. • Analyzed business systems and procedures to identify problems and increase operational efficiency. Conferred with multiple departments and systems to identify operational issues and recommend alternative technical solutions to improve business operations.		
Breakthrough Tech / Lead Vizion (FIU)	Data Engineering Intern	August 2024 – November 2024
• Designed and programmed scripting automation using Python to analyze data processing functions and activities, automating manual processes and increasing operational efficiency by 20% through intelligent workflow design. • Conducted business analysis and validation testing of automated systems; performed testing and debugging of data applications; recommended technical solutions to improve business system performance and reliability. • Developed ad-hoc data quality and validation reports; documented technical requirements and testing procedures; supported development teams through collaborative version control and software development best practices using Git and GitHub.		

TECHNICAL PROJECTS & ACADEMIC CASE STUDIES

- Los Angeles Crime Investigation Analytics** | Power BI, Advanced DAX, Power Query | [GitHub](#)
- Built an interactive Power BI platform enabling investigators to identify case relationships, surface related incidents by offense patterns, and analyze temporal/geographic clusters.
 - Engineered advanced DAX calculations for many-to-many offense matching, Haversine distance analysis, and disconnected selectors for flexible investigative analysis.
 - Developed KPIs including incident match rate, case linkage depth, and investigation time-to-insight.

Healthcare Performance & Financial Analytics | Power BI, SQL, Python | [Github](#)

- Architected an end-to-end analytics platform processing 900K+ clinical records using Power Query, Python (Pandas), and SQL Server to track 15+ healthcare KPIs.
- Designed a star-schema Power BI model measuring patient utilization, clinical outcomes, revenue cycle performance, and financial performance across departments and payers.
- Delivered executive analytics for CFO, COO, and department stakeholders, including admissions, LOS, readmission rate, mortality rate, AR aging, claim volume, and revenue by payer/department.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Engineering | Florida International University (FIU)

Graduated April 2026 | GPA: 3.5 / 4.0

- Certification: Microsoft Certified: Azure Fundamentals (AZ-900)
